## **STUDENTS' FEEDBACK ANALYSIS**

2018-19

Officer-in-Charge  
Bidhannagar College  
EB-2, Salt Lake, Kol.-64

## Analysis of UG Student Feedback for the Academic Year 2018-2019

### Mechanism of the Feedback Analysis:

A mechanism of quantification based on the analysis of student feedback is adopted, using parameters related to a variety of items like the Course, the respective UG Department in general and the Teachers in particular. In quest of some sort of objectivity, only the outgoing 3<sup>rd</sup> year students of each UG Department are called upon to respond to the questionnaire, severally.

### A. Analysis of the College-level Infrastructural Facilities and Activities:

The 9 item questionnaire relates to the college level Infrastructural facilities and activities. Each question has 5 options - A, B, C, D and E. A, as verbally demonstrated to the students, stands for Excellent, B for Very Good, C for Good, D for Fair and E for Poor. The method quantification employed has a number of steps undertaken serially.

- **Step-1:** Difficult as the grades are to visualize, they are ordinal in nature and this justifies the correspondence developed of the grades to the numerical data assigned. Grade A is thus quantified as 5; B as 4; C as 3; D as 2; E as 1.
- **Step-2:** For each of the 9 items, the 'score' of the college-level Infrastructural facilities and activities at first computed for each of the 16 departments, therefore score for the college is prepared to make a visual representation on the basis of the average over department-wise scores, in which the high value (towards 5) indicates good performance and the low value (towards 1), poor.
- **Step-4:** Bar Diagram is prepared on the scores over 9 different items representing college-level Infrastructural facilities and activities.
- **Step-5:** Bar Diagrams on the scores are prepared for each of the 9 different items over all the 16 departments.
- **Step-6:** In order to get a single index over 9 items for a specific year, we have taken the average of the 9 indices. Thus a single composite index for the college is obtained.
- **Step-7:** A scale adjustment to the department-wise indices and college-level index are made in order that it takes values within the span of 0 (zero) and 1 (one), where 0 is indicative of the worst possible performance and 1 indicates the best possible. Obviously, 0.5 denotes the average. The adjusted indices are presented in the following Table 1.

Following the above steps, we found the normalized score of the college on Infrastructural facilities and activities is **0.743**. Last year (session 2017-18) this figure was **0.776**.

### **B. Analysis of the Department-wise Infrastructural Facilities and Activities:**

The 5 item questionnaire (a set of two) relates to the Infrastructural facilities and activities owned by the Department. Each question has 5 options - A, B, C,D and E. A, as verbally demonstrated to the students, stands for Excellent, B for Very Good, C for Good, D for Fair and E for Poor. The questionnaire involves a multiplicity of items and issues like learning value of the course, its depth and applicability, the infrastructure of a department and its academic ambience.

The method quantification employed has a number of steps undertaken serially.

- **Step-1:** Difficult as the grades are to visualize, they are ordinal in nature and this justifies the correspondence developed of the grades to the numerical data assigned. Grade A is thus quantified as 5; B as 4; C as 3; D as 2; E as 1.
- **Step-2:** For each of the 5 items, the 'score' of a department is thus prepared to make a visual representation for the department on the basis of the average over department-wise responses, in which the high value (towards 5) indicates good performance and the low value (towards 1), poor.
- **Step-3:** All the 16 departments are put under the same process of 'score' quantification.
- **Step-4:** Bar Diagrams on the scores are prepared for each of the 5 different items over all the 16 departments.
- **Step-5:** To assess the aggregative performance of a department over 5 items, an index for each of the 16 departments over 5 items for a specific year is formulated just by taking average over the 5 scores on 5 items.
- **Step-6:** In order to get a single index over 5 items for a specific year, we have taken the weighted average of the indices for every department, the weights being the number of responses for every department. Thus a single composite index for the college is obtained.
- **Step-7:** A scale adjustment to the department-wise indices and college-level index are made in order that it takes values within the span of 0 (zero) and 1 (one), where 0 is indicative of the worst possible performance and 1 indicates the best possible. Obviously, 0.5 denotes the average. The adjusted indices are presented in the following Table 1.

### C. Analysis of the Department-wise Feedback on Teaching:

A separate questionnaire is fashioned to get student feedback in respect of individual teachers of a Department in the context of three teaching attributes – (i) Quality and Effectiveness of Teaching, (ii) Responsibility and (iii) Punctuality and Availability. Six different questions are set over the three attributes and the students are invited to mark their teachers on a 10-point scale.

- **Step 1:** Quality, Responsibility and Punctuality/ Availability – these are the three distinct heads under which the questions set are merged, analyzed and visually projected department-wise through bar-diagram.
- **Step 2:** For each of the 3 attributes, the 'score' of a department is thus prepared to make a visual representation for the department on the basis of the average of the scores secured by respective department faculties from respective students' responses, in which the high value (towards 10) indicates good performance and the low value (towards 1), poor.
- **Step 3:** All the departments are put under the same process of quantification.
- **Step-4:** Bar Diagrams on the scores are prepared for each of the 3 attributes over all the 16 departments.
- **Step-5:** To assess the aggregative performance of a department over the 3 attributes, an index for each of the 16 departments for a specific year is formulated just by taking average over the 3 scores on the 3 attributes.
- **Step-6:** In order to get a single index for college over the 3 attributes for a specific year, we have taken the weighted average of the indices of all departments, the weights being the number of responses for every department. Thus a single composite index for the college is obtained.
- **Step-7:** A scale adjustment to the department-wise indices and college-level index are made in order that it takes values within the span of 0 (zero) and 1 (one), where 0 is indicative of the worst possible performance and 1 indicates the best possible. Obviously, 0.5 denotes the average. The adjusted indices are presented in the following Table 2.

## **STUDENTS' FEEDBACK ANALYSIS**

2018-19

## Analysis of PG Student Feedback for the Academic Year 2018-19

### Mechanism of the Feedback Analysis:

A mechanism of quantification based on the analysis of student feedback is adopted, using parameters related to a variety of items like the Course, the respective PG Department in general and the Teachers in particular. In quest of some sort of objectivity, only the outgoing 2<sup>rd</sup> year PG students of each Department are called upon to respond to the questionnaire, severally.

### A. Analysis of the College-level Infrastructural Facilities and Activities:

The 13 item questionnaire relates to the college level Infrastructural facilities and activities. Each question has 4 options - A, B, C and D. A, as verbally demonstrated to the students, stands for Very Good, B for Good, C for Fair and D for Poor. The method quantification employed has a number of steps undertaken serially.

- **Step-1:** Difficult as the grades are to visualize, they are ordinal in nature and this justifies the correspondence developed of the grades to the numerical data assigned. Grade A is thus quantified as 4; B as 3; C as 2; D as 1.
- **Step-2:** For each of the 13 items, the 'score' of the college-level Infrastructural facilities and activities at first computed for each of the 3 PG departments. Therefore 13 scores for the college is categorized into 5 categories and the category-wise scores are prepared to make a visual representation on the basis of the average over department-wise scores, in which the high value (towards 4) indicates good performance and the low value (towards 1), poor.
- **Step-3:** Bar Diagram is prepared on the scores over the 5 different categories of items representing college-level Infrastructural facilities and activities. Those 5 categories are: (i) College Environment, (ii) Cleanliness of Campus, (iii) Infrastructure of the college, (iv) Central Library: Availability & Access and (v) Computer Training, Sports & Co-curricular Activities.
- **Step-4:** Bar Diagrams on the scores are prepared for each of the 5 categories of items over all the 3 PG departments.
- **Step-5:** In order to get a single index over 5 categories for a specific year, we have taken the average of the indices of 5 categories (i.e., 13 items). Thus a single composite index for the college is obtained.
- **Step-6:** A scale adjustment to the department-wise indices and college-level index are made in order that it takes values within the span of 0 (zero) and 1 (one), where 0 is indicative of the worst possible performance and 1 indicates the best possible. Obviously, 0.5 denotes the average. The adjusted indices are presented in the following Table 1.

Following the above steps, we found the normalized score of the college on Infrastructural facilities and activities is **0.75**. Last two years this figure were **0.687 (for session 2017-18)** and **0.634 (for session 2016-17), respectively**.

### C. Analysis of the Department-wise Feedback on Teaching:

A separate questionnaire is fashioned to get student feedback in respect of individual teachers of a Department in the context of three teaching attributes – (i) Quality and Effectiveness of Teaching, (ii) Sense of Responsibility in Teaching and (iii) Punctuality and Availability. Six different questions are set over the three attributes and the students are invited to mark their teachers on a 10-point scale.

- **Step 1:** Quality, Responsibility and Punctuality/ Availability – these are the three distinct heads under which the questions set are merged, analyzed and visually projected department-wise through bar-diagram.
- **Step 2:** For each of the 3 attributes, the 'score' of a department is thus prepared to make a visual representation for the department on the basis of the average of the scores secured by respective department faculties from respective students' responses, in which the high value (towards 10) indicates good performance and the low value (towards 1), poor.
- **Step 3:** All the departments are put under the same process of quantification.
- **Step-4:** Bar Diagrams on the scores are prepared for each of the 3 attributes over all the 16 departments.
- **Step-5:** To assess the aggregative performance of a department over the 3 attributes, an index for each of the 16 departments for a specific year is formulated just by taking average over the 3 scores on the 3 attributes.
- **Step-6:** In order to get a single index for college over the 3 attributes for a specific year, we have taken the weighted average of the indices of all departments, the weights being the number of responses for every department. Thus a single composite index for the college is obtained.
- **Step-7:** A scale adjustment to the department-wise indices and college-level index are made in order that it takes values within the span of 0 (zero) and 1 (one), where 0 is indicative of the worst possible performance and 1 indicates the best possible. Obviously, 0.5 denotes the average. The adjusted indices are presented in the following Table 2.

## **STUDENTS' FEEDBACK ANALYSIS**

2019-20

  
Officer-in-Charge  
Bidhannagar College  
EB-2, Salt Lake, Kol.-64

## Analysis of PG Student Feedback for the Academic Year 2019-20

### Mechanism of the Feedback Analysis:

A mechanism of quantification based on the analysis of student feedback is adopted, using parameters related to a variety of items like the Course, the respective PG Department in general and the Teachers in particular. In quest of some sort of objectivity, only the outgoing 2<sup>rd</sup> year PG students of each Department are called upon to respond to the questionnaire, severally.

### A. Analysis of the College-level Infrastructural Facilities and Activities:

The 13 item questionnaire relates to the college level Infrastructural facilities and activities. Each question has 4 options - A, B, C and D. A, as verbally demonstrated to the students, stands for Very Good, B for Good, C for Fair and D for Poor. The method quantification employed has a number of steps undertaken serially.

- **Step-1:** Difficult as the grades are to visualize, they are ordinal in nature and this justifies the correspondence developed of the grades to the numerical data assigned. Grade A is thus quantified as 4; B as 3; C as 2; D as 1.
- **Step-2:** For each of the 13 items, the 'score' of the college-level Infrastructural facilities and activities at first computed for each of the 3 PG departments. Therefore 13 scores for the college is categorized into 5 categories and the category-wise scores are prepared to make a visual representation on the basis of the average over department-wise scores, in which the high value (towards 4) indicates good performance and the low value (towards 1), poor.
- **Step-3:** Bar Diagram is prepared on the scores over the 5 different categories of items representing college-level Infrastructural facilities and activities. Those 5 categories are: (i) College Environment, (ii) Cleanliness of Campus, (iii) Infrastructure of the college, (iv) Central Library: Availability & Access and (v) Computer Training, Sports & Co-curricular Activities.
- **Step-4:** Bar Diagrams on the scores are prepared for each of the 5 categories of items over all the 3 PG departments.
- **Step-5:** In order to get a single index over 5 categories for a specific year, we have taken the average of the indices of 5 categories (i.e., 13 items). Thus a single composite index for the college is obtained.
- **Step-6:** A scale adjustment to the department-wise indices and college-level index are made in order that it takes values within the span of 0 (zero) and 1 (one), where 0 is indicative of the worst possible performance and 1 indicates the best possible. Obviously, 0.5 denotes the average. The adjusted indices are presented in the following Table 1.

Following the above steps, we found the normalized score of the college on Infrastructural facilities and activities is **0.781**. Last two years this figure were **0.750 (for session 2018-19)** and **0.687 (for session 2017-18)**, respectively.

### **B. Analysis of the Department-wise Infrastructural Facilities and Activities:**

The 12 items questionnaire (a set of two) relates to the teaching quality, Infrastructural facilities and activities owned by the Department. Each question has 4 options - A, B, C and D. A, as verbally demonstrated to the students, stands for Very Good, B for Good, C for Fair and D for Poor. The questionnaire involves a multiplicity of items and issues like teaching quality and guidance, departmental infrastructure and its academic ambience.

The method quantification employed has a number of steps undertaken serially.

- **Step-1:** Difficult as the grades are to visualize, they are ordinal in nature and this justifies the correspondence developed of the grades to the numerical data assigned. Grade A is thus quantified as 4; B as 3; C as 2; D as 1.
- **Step-2:** For each of the 12 items, the 'score' of the department at first computed for each of the 3 PG departments. Therefore 12 scores for the college is categorized into 3 categories and the category-wise scores are prepared to make a visual representation for the department on the basis of the average over items belong to the category, in which the high value (towards 4) indicates good performance and the low value (towards 1), poor.
- **Step-3:** All the 3 PG departments are put under the same process of 'score' quantification.
- **Step-4:** Bar Diagram is prepared on the scores over the 3 different categories of items representing department. Those 3 categories are: (i) Teaching quality & Guidance, (ii) Departmental Library & Infrastructural Facilities, (iii) Career Counseling Assistance/ Discussions.
- **Step-5:** Bar Diagrams on the scores are prepared for each of the 3 categories of items over all the 3 PG departments.
- **Step-6:** In order to get a single index over 3 categories for a specific department in a specific year, we have taken the average of the indices of 3 categories (i.e., 12 items). Thus a single composite index for the college is obtained.
- **Step-7:** In order to get a single index over 3 departments for a specific category in a specific year, we have taken the average of the indices of 3 departments. Thus a single composite index for the college is obtained.
- **Step-8:** A scale adjustment to the department-wise indices and college-level index are made in order that it takes values within the span of 0 (zero) and 1 (one), where 0 is indicative of the worst possible performance and 1 indicates the best possible. Obviously, 0.5 denotes the average. The adjusted indices are presented in the following Table 1 and 2.

## Analysis of UG Student Feedback for the Academic Year 2020-2021

### Mechanism of the Feedback Analysis:

A mechanism of quantification based on the analysis of student feedback is adopted, using parameters related to a variety of items like the Course, the respective UG Department in general and the Teachers in particular. In quest of some sort of objectivity, only the outgoing 3<sup>rd</sup> year students of each UG Department are called upon to respond to the questionnaire, severally. This year feedbacks are taken from students in completely **ONLINE** mode.

### A. Analysis of the College-level Infrastructural Facilities and Activities:

The 9 item questionnaire relates to the college level Infrastructural facilities and activities. Each question has 5 options - A, B, C, D and E. A, as verbally demonstrated to the students, stands for Excellent, B for Very Good, C for Good, D for Fair and E for Poor. The method quantification employed has a number of steps undertaken serially.

- **Step-1:** Difficult as the grades are to visualize, they are ordinal in nature and this justifies the correspondence developed of the grades to the numerical data assigned. Grade A is thus quantified as 5; B as 4; C as 3; D as 2; E as 1.
- **Step-2:** For each of the 9 items, the 'score' of the college-level Infrastructural facilities and activities at first computed over all the 16 departments, therefore score for the college is prepared to make a visual representation on the basis of the average over department-wise scores, in which the high value (towards 5) indicates good performance and the low value (towards 1), poor.
- **Step-4:** Bar Diagram is prepared on the scores over 9 different items representing college-level Infrastructural facilities and activities.
- **Step-5:** In order to get a single index over 9 items for a specific year, we have taken the average of the 9 indices. Thus a single composite index for the college is obtained.
- **Step-6:** A scale adjustment to the department-wise indices and college-level index are made in order that it takes values within the span of 0 (zero) and 1 (one), where 0 is indicative of the worst possible performance and 1 indicates the best possible. Obviously, 0.5 denotes the average. The adjusted indices are presented in the following Table 1.

Following the above steps, we found the normalized score of the college on Infrastructural facilities and activities is **0.775**. Last year (session 2019-20) this figure was **0.788**.

  
Officer-in-Charge  
Bidhannagar College

## Analysis of PG Student Feedback for the Academic Year 2020-21

### Mechanism of the Feedback Analysis:

A mechanism of quantification based on the analysis of student feedback is adopted, using parameters related to a variety of items like the Course, the respective PG Department in general and the Teachers in particular. In quest of some sort of objectivity, only the outgoing 2<sup>rd</sup> year PG students of each Department are called upon to respond to the questionnaire, severally.

### A. Analysis of the College-level Infrastructural Facilities and Activities:

The 9 item questionnaire relates to the college level Infrastructural facilities and activities. Each question has 5 options - A, B, C, D and E. A, as verbally demonstrated to the students, stands for Extremely Good, B for Very Good, C for Good, D for Fair and E for Unsatisfactory. The method quantification employed has a number of steps undertaken serially.

- **Step-1:** Difficult as the grades are to visualize, they are ordinal in nature and this justifies the correspondence developed of the grades to the numerical data assigned. Grade A is thus quantified as 5; B as 4; C as 3; D as 2 and E as 1.
- **Step-2:** For each of the 9 items, the 'score' of the college-level Infrastructural facilities and activities at first computed over the all 6 PG departments. In score, the high value (towards 5) indicates extremely good performance and the low value (towards 1), poor/unsatisfactory.
- **Step-3:** Bar Diagram is prepared on the scores of these 9 items which can be categorized in to 5 different categories of items representing college-level Infrastructural facilities and activities. Those 5 categories are: (i) Cleanliness of Campus, (ii) College Environment, (iii) Infrastructure of the college, (iv) Availability of Co-curricular Activities and (v) Central Library: Availability & Access.
- **Step-5:** In order to get a single index over 9 items for a specific year, we have taken the average of the indices. Therefore, a scale adjustment to the college-level index are made in order that it takes values within the span of 0 (zero) and 1 (one), where 0 is indicative of the worst possible performance and 1 indicates the best possible. Obviously, 0.5 denotes the average.

Following the above steps, we found the normalized score of the college on Infrastructural facilities and activities is **0.854**. In last two years, this figure were **0.781 (for session 2019-20)** and **0.750 (for session 2018-19), respectively**.

  
Officer-in-Charge  
Bidhannagar College  
EB-2, Salt Lake, Kol.-64

1. Cleanliness of toilets, 2. Cleanliness of campus, 3. Availability of Administrative/official help, 4. Usefulness of the campus for co-curricular activities, 5. Availability of indoor facilities in terms of games and sports, 6. Quality of environment in favour of cultural activities, 7. Availability of, access to books in the Central Library, 8. Cooperation of the Library staff, 9. Availability of online services in terms of academic resources

### **B. Analysis of the Department-wise Infrastructural Facilities and Activities:**

The 5 items questionnaire (a set of two) relates to the teaching quality, Infrastructural facilities and co-curricular activities owned by the Department. Each question has 5 options - A, B, C, D and E. A, as verbally demonstrated to the students, stands for Extremely Good, B for Very Good, C for Good, D for Fair and E for Unsatisfactory. The questionnaire involves a multiplicity of items and issues like teaching quality and guidance, departmental infrastructure and its academic ambience.

- **Step-1:** Difficult as the grades are to visualize, they are ordinal in nature and this justifies the correspondence developed of the grades to the numerical data assigned. Grade A is thus quantified as 4; B as 3; C as 2; D as 1.
- **Step-2:** For each of the 12 items, the 'score' of the department at first computed for each of the 3 PG departments. Therefore 12 scores for the college is categorized into 3 categories and the category-wise scores are prepared to make a visual representation for the department on the basis of the average over items belong to the category, in which the high value (towards 4) indicates good performance and the low value (towards 1), poor.
- **Step-3:** All the 3 PG departments are put under the same process of 'score' quantification.
- **Step-4:** Bar Diagram is prepared on the scores over the 3 different categories of items representing department. Those 3 categories are: (i) Teaching quality & Guidance, (ii)

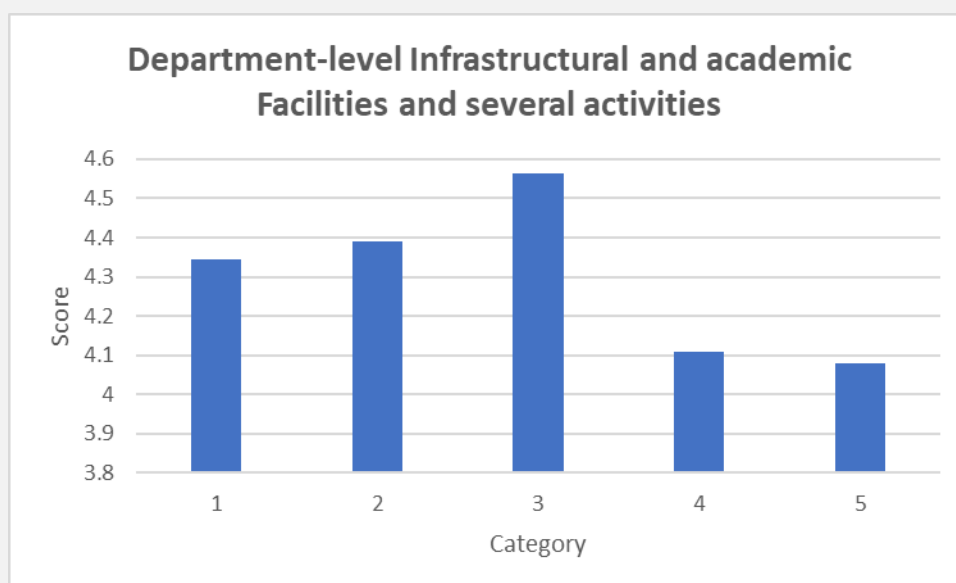

## PG Feedback Analysis for The Academic Session 2020-21

Departmental Library & Infrastructural Facilities, (iii) Career Counseling Assistance/ Discussions.

- **Step-5:** Bar Diagrams on the scores are prepared for each of the 3 categories of items over all the 3 PG departments.
- **Step-6:** In order to get a single index over 3 categories for a specific department in a specific year, we have taken the average of the indices of 3 categories (i.e., 12 items). Thus a single composite index for the college is obtained.
- **Step-7:** In order to get a single index over 3 departments for a specific category in a specific year, we have taken the average of the indices of 3 departments. Thus a single composite index for the college is obtained.
- **Step-8:** A scale adjustment to the department-wise indices and college-level index are made in order that it takes values within the span of 0 (zero) and 1 (one), where 0 is indicative of the worst possible performance and 1 indicates the best possible. Obviously, 0.5 denotes the average. The adjusted indices are presented in the following Table 1 and 2.

At present session (i.e. 2020-21), the normalized index for the college overall is **0.859** against the responses of **64 PG students**. In **Last year (session 2019-20)**, normalized index for the college overall was **0.743** for total **63 PG students**.

1. The Academic Infrastructure (Laboratory and/or Computer, Departmental Library, Equipments) at Department, 2. Use of teaching aids/audio visual aids, 3. Space Availability in the Department, 4. Usefulness of the campus for co-curricular activities, 5. Encouragement to Curricular and Co-curricular Activities by the Department.

  
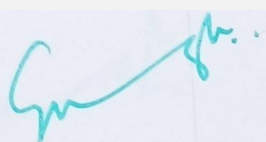

Officer-in-Charge

### C. Analysis of the Department-wise Feedback on Teaching:

A separate questionnaire is fashioned to get student feedback in respect of individual teachers of a Department in the context of three teaching attributes – (i) Quality and Effectiveness of Teaching, (ii) Responsibility and (iii) Punctuality and Availability. Six different questions are set over the three attributes and the students are invited to mark their teachers on a 4-point scale.

- **Step 1:** Quality, Responsibility and Punctuality/ Availability – these are the three distinct heads under which the questions set are merged, analyzed and visually projected department-wise through bar-diagram.
- **Step 2:** For each of the 3 attributes, the 'score' of a department is thus prepared to make a visual representation for the department on the basis of the average of the scores secured by respective department faculties from respective students' responses, in which the high value (towards 5) indicates extremely good performance and the low value (towards 1), poor.
- **Step 3:** All the 6 departments are put under the same process of quantification.
- **Step-4:** Bar Diagrams on the scores are prepared for each of the 3 attributes over all the 6 PG departments.
- **Step-5:** To assess the aggregative performance of a department over the 3 attributes, an index for each of the 6 PG departments for a specific year is formulated just by taking average over the 3 scores on the 3 attributes.
- **Step-6:** In order to get a single index for college over the 3 attributes for a specific year, we have taken the weighted average of the indices of all departments, the weights being the number of responses for every department. Thus a single composite index for the college is obtained.
- **Step-7:** A scale adjustment to the department-wise indices and college-level index are made in order that it takes values within the span of 0 (zero) and 1 (one), where 0 is indicative of the worst possible performance and 1 indicates the best possible. Obviously, 0.5 denotes the average. The adjusted indices are presented in the following Table 1.

## Analysis of UG Student Feedback for the Academic Year 2021-2022

### Mechanism of the Feedback Analysis:

A mechanism of quantification based on the analysis of student feedback is adopted, using parameters related to a variety of items like the Course, the respective UG Department in general and the Teachers in particular. In quest of some sort of objectivity, only the outgoing 3<sup>rd</sup> year students of each UG Department are called upon to respond to the questionnaire, severally. This year feedbacks are taken from students in completely **ONLINE** mode.

### A. Analysis of the College-level Infrastructural Facilities and Activities:

The 9 item questionnaire relates to the college level Infrastructural facilities and activities. Each question has 5 options - A, B, C, D and E. A, as verbally demonstrated to the students, stands for Excellent, B for Very Good, C for Good, D for Fair and E for Poor. The method quantification employed has a number of steps undertaken serially.

- **Step-1:** Difficult as the grades are to visualize, they are ordinal in nature and this justifies the correspondence developed of the grades to the numerical data assigned. Grade A is thus quantified as 5; B as 4; C as 3; D as 2; E as 1.
- **Step-2:** For each of the 9 items, the 'score' of the college-level Infrastructural facilities and activities at first computed over all the 16 departments, therefore score for the college is prepared to make a visual representation on the basis of the average over department-wise scores, in which the high value (towards 5) indicates good performance and the low value (towards 1), poor.
- **Step-4:** Bar Diagram is prepared on the scores over 9 different items representing college-level Infrastructural facilities and activities.
- **Step-5:** In order to get a single index over 9 items for a specific year, we have taken the average of the 9 indices. Thus a single composite index for the college is obtained.
- **Step-6:** A scale adjustment to the department-wise indices and college-level index are made in order that it takes values within the span of 0 (zero) and 1 (one), where 0 is indicative of the worst possible performance and 1 indicates the best possible. Obviously, 0.5 denotes the average. The adjusted indices are presented in the following Table 1.

Following the above steps, we found the normalized score of the college on Infrastructural facilities and activities is **0.734**. Last year (session 2020-21) this figure was **0.775**.

  
Officer-in-Charge

1. Cleanliness of Toilets, 2. Cleanliness of Campus, 3. Administrative Help, 4. Environment for Co-curricular Activities, 5. Scope for Indoor Games, 6. Environment for Cultural Activities, 7. Central Library Books: Availability & Access, 8. Co-operation of Library Staff, 9. Access to Online Academic Resources.

### **B. Analysis of the Department-wise Infrastructural Facilities and Activities:**

The 5 item questionnaire (a set of two) relates to the Infrastructural facilities and activities owned by the Department. Each question has 5 options - A, B, C, D and E. A, as verbally demonstrated to the students, stands for Excellent, B for Very Good, C for Good, D for Fair and E for Poor. The questionnaire involves a multiplicity of items and issues like learning value of the course, its depth and applicability, the infrastructure of a department and its academic ambience.

The method quantification employed has a number of steps undertaken serially.

- **Step-1:** Difficult as the grades are to visualize, they are ordinal in nature and this justifies the correspondence developed of the grades to the numerical data assigned. Grade A is thus quantified as 5; B as 4; C as 3; D as 2; E as 1.
- **Step-2:** For each of the 5 items, the 'score' of is thus prepared to make a visual representation of the college on the basis of the average gradings over department-wise responses, in which the high value (towards 5) indicates good performance and the low value (towards 1), poor.
- **Step-3:** In order to get a single index over 5 items for a specific year for the college, we have taken the average of the indices. Thus a single composite index for the college is obtained.
- **Step-4:** A scale adjustment to the department-wise indices and college-level index are made in order that it takes values within the span of 0 (zero) and 1 (one), where 0 is indicative of the worst possible performance and 1 indicates the best possible. Obviously, 0.5 denotes the average.

## UG Feedback Analysis for The Academic Session 2021-22

**Table 1:**  
**No. of students who responded to the feedback questions**

Department	No. of Respondents
Bengali	6
Education	5

## Analysis of UG & PG Student Feedback for the Academic Year 2022-2023

### Mechanism of the Feedback Analysis:

A mechanism of quantification based on the analysis of student feedback is adopted, using parameters related to a variety of items like the Course, the respective Department in general, and the Teachers in particular. In quest of some sort of objectivity, only the outgoing final year students of every UG & PG program are called upon to respond to the questionnaire, severally. Like the last year, this year's feedbacks are taken from students in completely **ONLINE** mode.

### A. Analysis of the College-level Infrastructural Facilities and Activities:

The 9-item questionnaire relates to the college level Infrastructural facilities and activities. Each question has 5 options - A, B, C, D, and E. A, as verbally demonstrated to the students, stands for Excellent, B for Very Good, C for Good, D for Fair, and E for Poor. The method quantification employed has several steps undertaken serially.

- **Step-1:** Difficult as the grades are to visualize, they are ordinal and this justifies the correspondence developed of the grades to the numerical data assigned. Grade A is thus quantified as 5; B as 4; C as 3; D as 2; E as 1.
- **Step-2:** For each of the 9 items, the 'score' of the college-level Infrastructural facilities and activities at first computed over all the 16 departments, therefore score for the college is prepared to make a visual representation based on the average over department-wise scores, in which the high value (towards 5) indicates good performance and the low value (towards 1), poor.
- **Step-4:** A Bar Diagram is prepared on the scores over 9 different items representing college-level Infrastructural facilities and activities.
- **Step-5:** To get a single index over 9 items for a specific year, we have taken the average of the 9 indices. Thus a single composite index for the college is obtained.
- **Step-6:** A scale adjustment to the department-wise indices and college-level index is made so that it takes values within the span of 0 (zero) and 1 (one), where 0 is indicative of the worst possible performance and 1 indicates the best possible. 0.5 denotes the average. The adjusted indices are presented in the following Table 1.

Following the above steps, we found the normalized score of the college on Infrastructural facilities and activities is **0.722**. Last year (session 2021-22) this figure was **0.734**.

### **D. Analysis of the Department-wise Feedback on Post-Graduate Teaching:**

A separate questionnaire is fashioned to get student feedback concerning individual teachers of a Department in the context of three teaching attributes – (i) Quality and Effectiveness of Teaching, (ii) Responsibility, and (iii) Punctuality and Availability. Six different questions are set over the three attributes and the students are invited to mark their teachers on a 4-point scale.

- **Step 1:** Quality, Responsibility, and Punctuality/ Availability – these are the three distinct heads under which the questions set are merged, analyzed, and visually projected department-wise through a bar diagram.
- **Step 2:** For each of the 3 attributes, the 'score' of a department is thus prepared to make a visual representation for the department based on the average of the scores secured by respective department faculties from respective students' responses, in which the high value (towards 5) indicates extremely good performance and the low value (towards 1), poor.
- **Step 3:** All the 6 departments are put under the same process of quantification.
- **Step 4:** A scale adjustment to the department-wise indices is made so that it takes values within the span of 0 (zero) and 1 (one), where 0 is indicative of the worst possible performance and 1 indicates the best possible. 0.5 denotes the average. The adjusted indices are presented in the following Table 1.
- **Step-5:** Bar Diagrams on the scores are prepared for each of the 3 attributes over all the 6 PG departments.
- **Step-6:** To assess the aggregative performance of a department over the 3 attributes, an index for each of the 6 PG departments for a specific year is formulated just by taking the average over the 3 scores on the 3 attributes.
- **Step-7:** To get a single index for college over the 3 attributes for a specific year, we have taken the weighted average of the indices of all departments, the weights being the number of responses for every department. Thus, a single composite index for the college is obtained.

## UG & PG Feedback Analysis for The Academic Session 2022-23

**Table 3**

Indices of different departments relating to Teachers' Responsibility, Quality and Availability/Punctuality. Figures presented in ( ) correspond to the last analyzed year 2020-21 for 64 students

Department	Normalized Index				No. of Respondents
	Quality	Responsibility	Punctuality/ Availability	Aggregate	
Chemistry	3.996	4.063	4.176	4.078	27
Microbiology	4.335	4.305	4.295	4.312	18
Zoology	4.798	4.828	4.747	4.791	23
Anthropology	4.670	4.633	4.657	4.653	14
Botany	4.559	4.623	4.584	4.589	11
Education	3.083	3.000	2.875	2.986	1
<b>College</b>	<b>0.882 (0.88)</b>	<b>0.887(0.84)</b>	<b>0.889(0.83)</b>	<b>0.886(0.85)</b>	<b>94</b>

In the last year (i.e. session 2020-21), aggregated normalized indices for three departments Chemistry, Microbiology, Zoology, Anthropology, Botany and Education were **0.863, 0.859, 0.886, 0.891, 0.938 and 0.672 respectively**. Overall college level aggregated normalized index in teaching was **0.85 for total 64 PG students**. This year this figure is increased to **0.885**.
